

Stop the
Spread of
Germs &
Viruses with
High-Output
Germicidal
UVC Lamps

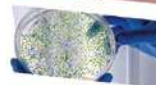

PROBLEM

Viruses

Bacteria

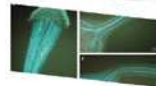

Mold

Flu Virus

Pollen Growth

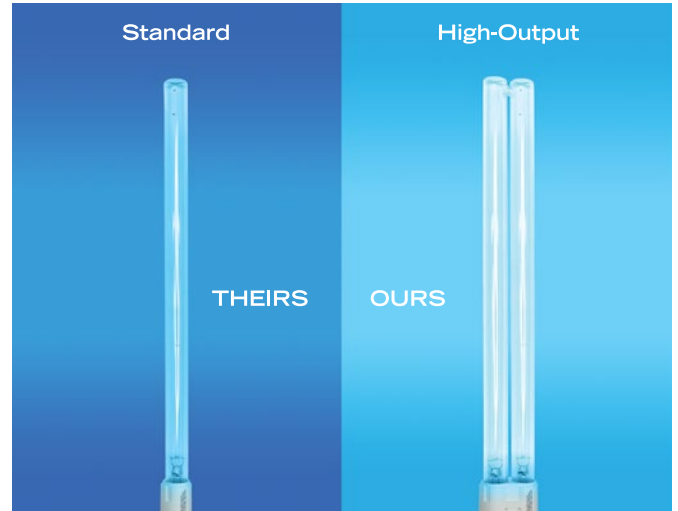

SOLUTION

**PHASE
2**

**Fixed Mount & Remote Mount
Germicidal UVC Systems**

ADVANTAGES

BENEFITS

High output UVC lamps that are 3.3 times more powerful than standard UVC lamps on the market.	Disinfects your air 24 hours a day naturally, without using chemicals or sprays, which can help reduce asthma and allergy symptoms.
UL2998 Listed and Verified.	Ozone-free Germicidal UVC lamps to inactivate viruses, bacteria, and other germs 24 hours a day naturally without the use of chemicals or sprays.
Powerful enough for surface kill of micro-organisms AND airborne irradiation.	Inactivates airborne viruses and bacteria as they pass by the lamp, rendering them harmless and incapable of reproducing.
LED power and lamp monitors let you know that system is working properly.	Easy to maintain and monitor.
Professional licensed contractor installation.	Ensures proper installation to manufacturer's specifications and protects the Lifetime warranty.
Extended life 2-year lamps – twice the life of standard lamps.	Offers 18,000 hours of active UVC protection and performance throughout the lamp's life.
Heat sink housing design dissipates heat from the electronic ballast.	Protects the electronic components from overheating for improved reliability and extended lifetime ballast life.
